### Software Engineering Intern

TÜBİTAK Bilgem YTE

07/2020 - 08/2020

Ankara-Turkey

Achievements/Tasks

- Created a Single Page Web Application (Activity Management System). ReactJS, Spring Web, Spring Data JPA, Spring Security and PostgreSQL used. For geological informations Geocode and Google Map used.

## ORGANIZATIONS

### PyLadies Ankara (11/2020 - Present)

R&D - Organization Committee Member

## KNOWLEDGES

## PROJECTS

Web Application : Local Firestore (NoSQL Database)

- ReactJS - Redux
- Command Pattern used for encapsulating CRUD request on any document and by using stack of requests, undoable operations created.

Web Application : File Repository in Ethereum

- ExpressJS - ReactJS - Web3JS - MongoDB
- Truffle - Ganache - Solidity
- Files which are belongs to students stored on smart contract and functions are called through rest api. Students' affairs personnel only login the client and request to endpoints.

Paper : Quorum Permissioned Blockchain

- Literature Review Blockchain, Ethereum and Quorum

Mobile/Arduino Application : Bluetooth RC Car

- Flutter - C
- Developed a remote-controlled car for video surveillance. This car is controlled by an Android application, and visual data is observed on any web browser connected to the same network as the car

Desktop Application : Crypto Messenger

- Java Swing
- Multi Client/Broadcast Server
- Socket Programming
- Symmetric Block Ciphers : AES - DES

Web Application : Bookstore

- ReactJS
- Spring Web - Spring Data JPA - Spring Security
- MySQL

Web Application : Shopping Platform

- MySQL Procedures - Functions -Triggers
- PHP - HTML - CSS

## LANGUAGES

English

Full Professional Proficiency
